# « Data Missingness – Fehlende Daten

- In Projekten können Codes für fehlende Werte definiert werden
- Bei der Dateneingabe können diese anstelle der Eingabe eines Wertes ausgewählt werden

**Missing Data Codes: Set up your missing data codes for this project**

Fields that have a blank/missing value may be marked with a custom 'Missing Data Code' to note why the value is blank. These missing codes may be used to aid in data analysis by specifying why a field lacks a value. To enable this feature below, enter both the codes AND their labels for all the categories of missing data that you wish to use in this project. The missing codes should be coded just like the choices of a multiple choice field with *code + comma + label*, in which the codes can only have letters, numbers, dots, dashes, and underscores (e.g., '-999, Not asked' or 'UNK, Unknown'). If no codes are entered, this feature will remain disabled.

[Read more detailed instructions.](#)

**Missing Data Codes**

NI, No information  
 INV, Invalid  
 UNK, Unknown  
 NASK, Not asked

Add code from standardized list of missing data codes (optional suggestions):

Add	NI	No information
Add	INV	Invalid
Add	UNK	Unknown
Add	NASK	Not asked
Add	ASKU	Asked but unknown
Add	NAV	Temporarily unavailable

Option 1  
 Option 2

**Mark field as:**

- [Clear value]
- No information (NI)
- Invalid (INV)
- Unknown (UNK)
- Not asked (NASK)

Option 1  
 Option 2  
 Option 3

No information (NI)

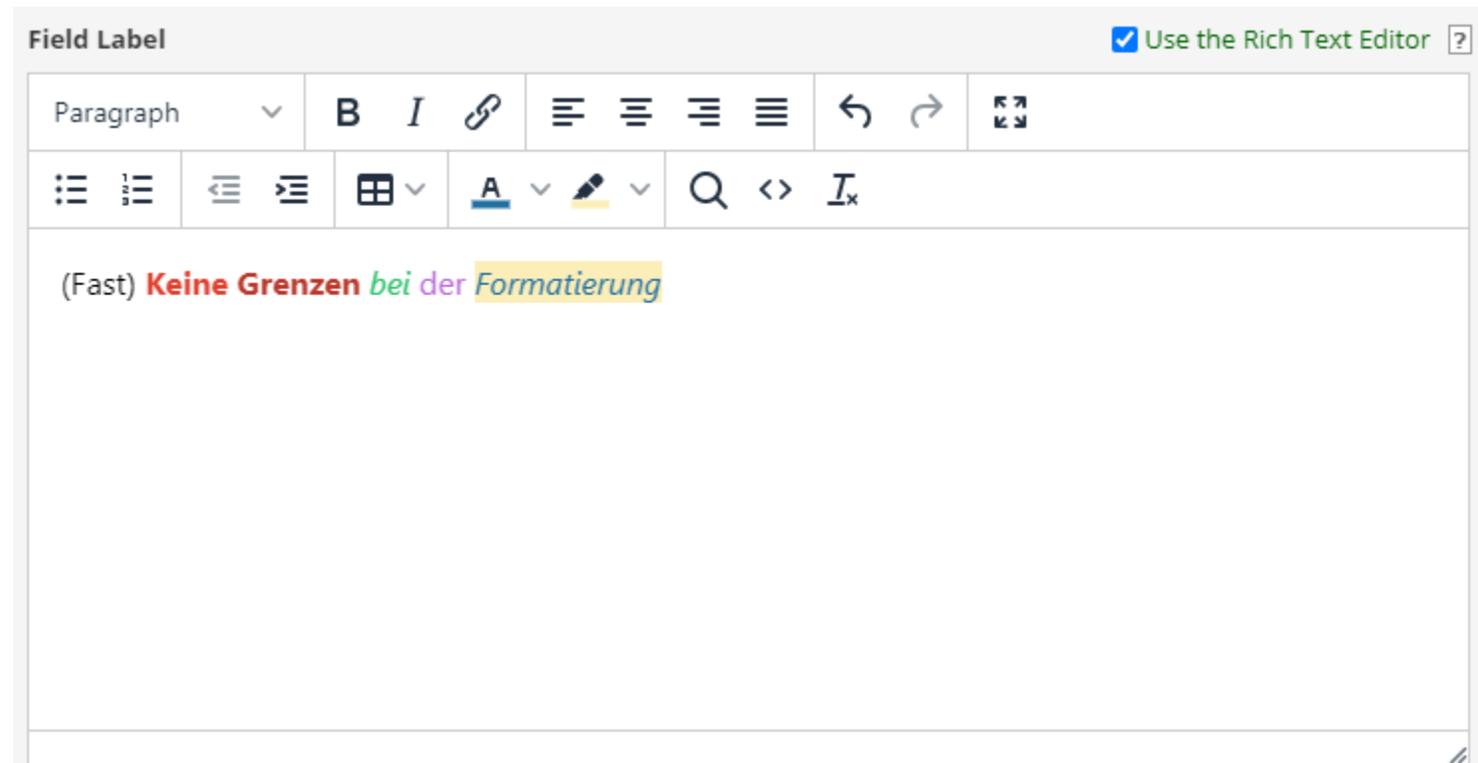

**Number of results returned: 4**  
 Total number of records queried: 4

**Addresses**

Study ID study_id	Street, City, State, ZIP address
1	Asked but unknown (ASKU)
2	123 Main St.
3	101 REDCap Way
4	Not applicable (NA)

Available Modules Search available modules

---

**Check for Duplicates Across Multiple Projects - v1.4** Discoverable

Checks for duplicate records (as defined by a certain number of matching fields) across one or more projects. If the field matches across multiple records, a duplicate is reported. (Does not currently work for repeating instruments/events.)

[View Documentation](#) Enable

---

**Date Calculated Fields - v9.9** Discoverable

Allows for piping from date fields to other date fields, regardless of format. Can pipe data across events within a REDCap project.

[View Documentation](#) Enable

---

**Email Alerts - v2.3.6** Discoverable

Allows users to construct and send customized email alerts to one or more recipients, in which the emails are triggered when a form/survey is completed and optionally based on conditional logic. The user interface enables customized options such as rich text, data piping, and file attachments.

[View Documentation](#) Enable

---

**Inline Descriptive Pop-ups - v1.1.1** Discoverable

Allows users to specify words or phrases on a form/survey to appear as a highlighted link that will display a popup of instructive text when the cursor moves over the word/phrase. The configuration allows multiple words/phrases to be utilized.

[View Documentation](#) Enable

---

**Instant Field Concatenation - v1.1** Discoverable

This module concatenates fields and places the result in another field instantly. It uses JavaScript and not PHP. It happens upon the user leaving the field.

[View Documentation](#) Enable

---

**MyCap - v9.9.9** Discoverable

Companion module for MyCap ([www.projectmycap.org](http://www.projectmycap.org))

[View Documentation](#) Request Activation

---

**VUNet ID Login with Survey Prefill - v1.0** Discoverable

Requires LDAP authentication on surveys, and pre-fills as many fields as possible from LDAP.

[View Documentation](#) Enable

**Make module discoverable by users:**

Display info on External Modules page in all projects:

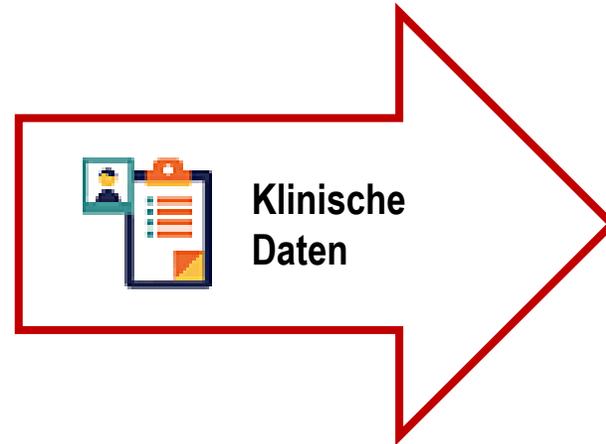

**Allow normal users to enable this module in projects:**

*(Applicable only for discoverable modules)* Allow normal users to enable this module on their own in any project where they have Project Setup/Design privileges (if left unchecked, then only administrators can enable this module):

# « Verbesserungen bei der FHIR® -Anbindung

Oder andere "SMART on FHIR"-fähige KIS

- Starten von CDP und Data Mart direkt aus REDCap heraus
- Verbesserte Zuweisung von Quelldaten zu Feldern
- (EPIC) „Break the Glass“
- Weitere Verbesserungen: einfacher und schneller

## « 🔔 Alerts & Notifications: **SMS und Sprachanrufe**

- Neben E-Mail nun auch SMS und Telefonanrufe
- **Aber:** nur über  **twilio**

# « Integrierter URL-Shortener

- [https://redcap.link/ GUG](https://redcap.link/GUG)

## All-Purpose REDCap URL Shortener (<https://redcap.link>)

This URL Shortener can create a random or custom link beginning with [https://redcap.link/](https://redcap.link) to be used as a redirect to any URL you wish. Note: This service is provided by Vanderbilt and is hosted on AWS. It is recommended that you utilize this service for REDCap-related matters only.

**DAG Switcher: Enable multiple Data Access Groups for users** Display options:  Rows are DAGs  Rows are Users

Users assigned to Data Access Groups (DAGs) can optionally be assigned to multiple \*potential\* DAGs, in which they may be given the privilege of switching in and out of specific DAGs on their own whenever they wish. To assign a user to multiple DAGs, check the checkboxes below for that user. At least two DAGs must be checked for a user in order for them to use the DAG Switcher. NOTE: This does not override a user's current DAG assignment, as set above or on the User Rights page.
