Berlin 19 Feb

Focus of biobanks in Sweden

- 99 biobanks. 68 hospital biobanks, 31 research biobanks

Tabell 2: Typ av verksamhetsområde

Biobank - verksamhetsområde	Antal
Patologi/Cytologi	17
Mikrobiologi	12
Klinisk kemi	10
Klinisk genetik	2
Immunologi	2
Transfusion	3
Transplantation	4
Gynekologi/Obstetrik	3
Forskning	31
Kombination av flera	3
Annan	12
Summa	99

Number of samples

Tabell 16: Antal prov/provtyp i provsamlingar för vård

Typ av prov	Antal
Vävnad	117 150 000
Cytologiprov/celler	31 100 000
Serum	2 200 000
Blod/Plasma*	4 530 000
Benmärg	110 000
DNA/RNA	69 000
Övrigt**	166 000
Summa:	154 325 000

*Av dessa är 3 700 000 PKU-prov

** Likvor, urin, äggceller, spermier, embryon, faeces

Tabell 17: Antal prov per provtyp i provsamlingar för forskning

Typ av prov	Antal
Blod/Plasma	4 222 000
Serum	2 338 000
RNA/ DNA	572 000
Urin	230 000
Saliv	112 000
Vävnad	51 000
Övrigt*	47 000
Summa	7 572 000

* benmärg, bröstmjölk, celler, dialysat, embryon, faeces, hår, sputum, tänder

Total of 160 million samples

Two biobank registers in Sweden

Swedish biobank register (SBR) - sample level - NOT MIABIS compatible

BBMRI.se Sample Collection Register - meta data level - MIABIS compatible

Svenskt biobanksmaterial och data

På den här sidan kan du söka i Svenska Biobankregistret (SBR) över provsamlningar och biobankier i Sverige. Du kan hitta data för insamlat biobanksmaterial i de olika regionerna och kontakta den biobanksordnare som är ansvarig för materialet vid behov.

SBR-Biobankier

The Swedish biobank register

- Since 2010
- Not part of BBMRI.se
- Secure login
- Main aim: health care biobanks - find samples in case of consent withdrawal
- Secondary aim: find samples for research
- No diagnosis, clinical information or linkage to other registers
- Coverage: approx. 1 million samples

The BBMRI.se register

- Launched in 2012 to gather meta-data on sample collections and research studies using human biological samples, including diagnosis and clinical information on a meta-level
- Scope: Stimulate networking among researcher for a better use of existing biobank samples, stimulate collaborations, search for research projects for collaborations.
- Coverage: 114 sample collections with samples from approx. 1.4 million donors

Welcome Organizations Sample Collections Omics Information

16/02/2015

Welcome to the BBMRI.se Register!

This website is intended to help researchers initiate collaborations. Here you can find information about sample collections containing human biological material as well as survey and register data associated with the donors. For further information, contact the responsible people for each sample collection.

Total number of donors: 1371315

To be able to register sample collections and studies you need to [apply for membership](#)

If you are a member, please [login](#)

Demo and Future Plans

Sample Collection

Material type: Whole blood Saliva Cell
 Plasma CSF Tissue
 Serum DNA Faeces
 Urine

Other:

Cell or Tissue Type:

Storage temperature: Room temperature
 +4C
 -18C to -35C

Other:

Sex: Female
 Male

Age youngest:

Age Oldest:

Diagnosis Group: Endocrine, nutritional and metab

Comorbidity:

Type of omics Genomics
